The test strategy is a living document and evolves over time and is relevant even when personnel come and go from time to time. It is important to strive to not over-document. Always document what is needed but document just what is needed for the work to be done. These are some commonly used documents in agile testing:

[How Test Documentation Work in Agile Projects? | ReQtest](#)

IEEE 829-2008, also known as the 829 Standard for Software Test Documentation, is an IEEE standard that specifies the form of a set of documents for use in defined stages of software testing, each stage potentially producing its own separate type of document. These stages are: Test plan identifier; Introduction; Test items; Features to be tested

[Test plan - Wikipedia](#)

The Test Plan document include and tracks the necessary information required to effectively define the approach to be used in the testing of the project's product. The Test Plan document is created during the Planning Phase of the project. Its intended audience is the project manager, project team, and testing team.
