## Community Development Financial Institution (CDFI)

Digital disruption at the grocery store By Steven Begley, Eric Marohn, Sabah Mikha, and Aaron Rettaliata Five trends are shaping the transformation of the US grocery industry. Understanding them is key for grocers to achieve profitable growth in this new competitive environment.

The CEO ' s Boss, originally published in 2010, is the definitive guide to a productive working relationship between corporate boards and CEOs. Speaking to an era when company directors must monitor the actions and day-to-day operations of their CEO, William M. Klepper offers eight essential lessons to help boards operate more effectively in this bold and independent role. Since the publication of the first edition, Klepper has continued to develop and apply its lessons for a variety of businesses and settings. In this second edition, Klepper renews the paradigm set forth in the first, with new case studies of companies such as Wells Fargo, BP, Hewlett-Packard, and Proctor & Gamble. Giving directors, executives, investors, and stakeholders the tools to make crucial relationships work, Klepper details the best techniques for selecting the right CEO, establishing a working relationship, and giving effective feedback. He affirms the importance of the social contract between directors and their CEOs, encourages directors to embrace their independence, and teaches executives to value tough love. He revisits the first edition ' s case studies and derives new insights from how these companies followed—or failed to heed—the book ' s precepts. He also takes a close look at the predictions he made almost ten years ago, providing new forecasts and integrating core

knowledge to ensure that The CEO ' s Boss remains essential in our ever-changing business landscape.

One person really can make a difference. From starting neighborhood kitchens to connecting food pantries with local family farms, Ali Berlow offers a variety of simple and practical strategies for improving your community ' s food quality and security. Learn how your actions can keep money in the local economy, reduce the carbon footprint associated with food transportation, and preserve local landscapes. The Food Activist Handbook gives you the know-how and inspiration to create a better world, one meal at a time.

Decades before Occupy Wall Street challenged the American financial system, activists began organizing alternatives to provide capital to “ unbankable ” communities and the poor. With roots in the civil rights, anti-poverty, and other progressive movements, they brought little training in finance. They formed nonprofit loan funds, credit unions, and even a new bank—organizations that by 1992 became known as “ community development financial institutions, ” or CDFIs. By melding their vision with that of President Clinton, CDFIs grew from church basements and kitchen tables to number more than 1,000 institutions with billions of dollars of capital. They have helped transform community development by providing credit and financial services across the United States, from inner cities to Native American reservations. Democratizing Finance traces the roots of community development finance over two centuries, a history that runs from Benjamin Franklin, through an ill-starred bank for African American veterans of the Civil War, the birth of the credit union movement, and the War on Poverty. Drawn from hundreds of interviews with CDFI

leaders, presidential archives, and congressional testimony, Democratizing Finance provides an insider view of an extraordinary public policy success. Democratizing Finance is a unique resource for practitioners, policymakers, researchers, and social investors.

Entrepreneurship and Local Economic Development delves into the current thinking on local entrepreneurship development programs and evaluates ways in which practitioners can implement successful entrepreneurship practices. Examining the role and potential for entrepreneurship programs in local economic development strategies, contributors to this edited collection have many years of experience working with entrepreneurship initiatives in state and local governments. Focused on theory and case study, Entrepreneurship and Local Economic Development examines conceptual issues involved in creating entrepreneurship programs as well as practical examples of programs organized by state, regional, and local agencies.

Obesity affects 17 percent of children and adolescents and almost 36 percent of adults in the United States. Conservative estimates suggest that obesity now accounts for almost 20 percent of national health care spending. Until the obesity epidemic is reversed, obesity will continue to drive rates of chronic diseases such as heart disease, stroke, type 2 diabetes, and certain types of cancer. Cross-Sector

Responses to Obesity is a summary of a workshop convened by the Institute of Medicine Roundtable on Obesity Solutions in September 2014 to explore models of cross-sector work that may reduce the prevalence and consequences of obesity. This report identifies case studies of cross-sector initiatives that engage partners from diverse fields, and lessons learned from and barriers to established cross-sector initiatives.
