Vascular surgery is a branch of medicine that deals with the diagnosis and treatment of diseases of the blood vessels, including arteries, veins, and lymphatics. Vascular surgeons are trained to perform both open and endovascular procedures. They treat a wide range of conditions, including atherosclerosis, aneurysms, and peripheral vascular disease. The vascular surgeon is trained

~~Vascular surgery - Wikipedia~~

You have an abdominal aortic aneurysm which is large enough to carry a real risk of rupture, which most people do not survive. Your surgeon has looked at the options and after discussion with you, it has been decided that an endovascular or keyhole operation is the best way of treating this.
